

Notes for Examinations

- A test usually has 18 to 25 questions. Each question carries equally 4 to 5 points, but the total number of missed points will be subtracted from 100.
- You are only allowed to refer to the provided formula sheet during the test. (*This sheet is not to have anything extra written on it, i.e. more formulas, definitions, homework solutions, etc.*)
- Please write the answer closest to your result on the indicated place. Only circling an answer will not be considered as your final answer.
- If you do not show your work, you will not have any points even though you marked the correct answer.
